Interpreting these results

The School Opinion Survey results are a snapshot of how schools are perceived by the school community.

The results of the surveys are most valuable when used as a starting point for further inquiry and informed decision-making, rather than viewed in isolation. This report is intended to be interpreted in conjunction with local knowledge available to schools.

When interpreting the results, consider:

- **Differences and patterns:** Are differences meaningful or potentially due to normal variation? What factors might help explain the differences observed?
- **Expectations:** How do the results compare with what might have been expected or predicted? Are there surprising, unusual or emerging patterns that warrant closer examination?
- **School context:** Are there findings that have particular relevance or significance for the school community?
- **Broader context:** How do results at your school contrast with other schools, your region and the state.
- **Further investigation:** What findings could benefit from more detailed examination or discussion to better understand the underlying issues?
- **Decision-making:** How could the findings inform priorities, planning or decisions within the school?
- **Opportunities:** What potential benefits or opportunities could arise from acting on the information?

Complementary information when examining these results:

- Qualitative feedback or other sources of local knowledge
- Previous survey results and trends over time
- Relevant school or community context
- Other data sources

Purpose of collection	- Increased understanding of opinions of parents/caregivers, students and school staff with various aspects of their school. - Increased understanding of areas of strength at Queensland state schools and areas that could be improved. - Increased understanding of various aspects of the work environment in Queensland state schools from staff and principals including effective relationships, work roles, general morale and development of schools as learning environments. - Key performance indicators in corporate documents such as service delivery statements, the strategic plan and the annual report as well as monitoring performance at both the school and systemic level.
Reference period	The surveys have been enumerated annually in July/August, and respondents were asked to respond thinking back over 'this school year'. 27 July to 21 August 2026
Collection method	The surveys have been collected using a mixture of paper forms and online surveys (using SurveyManager the department's online survey system): - Online for all surveys with email invitation to participants. - Paper survey forms made available for the Parent/Caregivers survey for selected remote schools and school communities requiring translations.
Scope and coverage	Data are only collected from Queensland state schools. Target populations are: Parent/Caregiver Survey - all families, one parent/caregiver invited based on the eldest child at the school (including parents/caregivers of Kindy, Preparatory Year and students at special schools). Student Survey - all students in Year 5, Year 6, Year 8 and Year 11 were invited by email. Schools determined survey administration locally to achieve desired response levels. Students at Special Schools Survey - administered to age equivalent students in special schools at the principals' discretion. Staff Survey - all Department of Education teaching and non-teaching staff in part-time and full-time employment (including principals).
Coherence	- Minor changes have occurred over the years, including the addition/removal of items and minor changes in item wording. - A complete review of methodology and data items occurred in 2021 resulting in a time series break for all surveys. - Reports for earlier years are available from <i>OneSchool</i>.

Reporting	Reporting levels available: • Queensland; • School level; and • Departmental reporting levels (school type and region). Reporting levels are available for each of the surveys: • Parent/Caregiver Survey; • Student Survey (excludes students at special schools); • Students at Special Schools Survey; and • Staff Survey (including principals).
Estimates	Data are reported as the number of total valid responses to an individual statement (denominator) and the percentage of valid responses for the agreement response scale. All data are unweighted.
Caveats	n: The number of respondents who answered an individual item. Agreement: Presents the aggregation of positive responses as a percentage; i.e.: "<i>Somewhat agree</i>", "<i>Agree</i>" and "<i>Strongly agree</i>". DW: Data withheld for confidentiality reasons. This can be for small respondent groups or where all responses to an item are the same. NA: Data not available. • Percentages are rounded to one decimal point in reports, so discrepancies may occur between sums of the component items and totals. • Staff includes responses from principals. • 'Staff' refers to both teaching and non-teaching staff.
Dissemination	• School level reports are released annually on <i>OneSchool Corporate Reporting</i>. • Queensland state schools receive annual school level reports, which include non-school level benchmark comparison data. • Schools are required to include survey results in their annual report. • The department includes statewide survey results in their annual report. • State level summary results are released on the department's website <https://qed.qld.gov.au/publications/reports/statistics/schooling/schools/schoolopinionsurvey> • Customised data are available upon request.
